- Adjustable height

The New Digital Countdown Clock

The clock comes with tripod and supports either 240v or 12v DC power. It uses high quality ultra-bright LEDs, which are adjustable. The continuous working time can reach up to 100,000 hours.

Designed to be used on sports fields, in schools, entertainment venues or business sites. The convenient wireless IR remote control can easily help you manage the time

The waterproof (IP65) cabinet enables the unit to operate in all conditions even when it's raining heavily. The anodized aluminum makes the cabinet durable & rugged

The control method is wireless IR remote control. The efficient control distance is within 10 meters in line of sight
It is important to point to the clock face with the IR remote control when you are controlling/editing the clock.
